
1. Adding Text Editing to the FiveDegrees Application	1
The Task Ahead	1
The Cocoa Text System	1
Implementing Text Editing	3
2. NSFileHandle	10
Introduction	10
Writing the File Read/Write Functions	10
Testing the Block File Functions	14
Challenge	17
3. Building a Spotlight Plugin for FiveDegrees	18
Spotlight and the Task Ahead	18
Uniform Type Identifiers	18
Basic File Metadata	21
Building a Spotlight Importer	23
A Note on Localization	30
4. Building a Quick Look Plugin for FiveDegrees	31
Quick Look and the Task Ahead	31
The Quick Look Plug-In Project	32
Debugging Quick Look Plug-Ins	37
5. AppleScript Support	38
AppleScript and Cocoa Scripting	38
Planning For Scriptability	38
Adding Minimal AppleScript Support	39
Overriding the document AppleScript Class	41
Adding a FiveDegrees Suite	42
Object Specifiers	43
Modifying FDNODE Properties With AppleScript	44
6. More AppleScript Support	46
Implementing Object-First Commands	46
Implementing Verb-First Commands	47
7. Apple Help	50
Introduction	50
Starting a Help Book	50
Using Anchors and Help URLs	54
Indexing a Help Book	56
Registering a Help Book	57
Opening a Help Book from Cocoa	57
For the More Curious	58
Automatic Reindexing of Help with Xcode	58
Challenge	59
8. Delivering Software With Package Maker	60
The Task Ahead	60
Preparing the Installer Package Payload	60
Creating the Installer Package	61
Running the Installer Package	66
Additional Details	66
9. Application Updates	68
The Sparkle Framework	68
Start the Exercise	68
Adding SUUpdater	69
Security	70
Setting-up an appcast	71
Running the Update	72
The SUUpdater API and Delegate Methods	73

10. Using C++ From Cocoa	78
Writing a C++ Wrapper	78
Using the Stack Class	80
Exceptions	82
Callbacks	82
11. Unit Testing	84
Motivation	84
OCUnit	84
Independent Unit Testing	85
Debugging Independent Unit Tests	93
Dependent Unit Testing	95
Debugging Dependent Unit Tests	96
For the More Curious	97
12. Image Drawing	98
Interface	98
Utility Functions	99
Core Graphics	100
Core Image	101
Core Animation	103
Challenge: Transitions	104
Challenge: CALayer	104
13. Cocoa/OpenGL Tricks	105
Creating an Overlay Window	105
Making an NSImage from an NSOpenGLView	109
Drawing with Quartz on a Texture	111
Making an NSImage into a texture	112
CGBitmapContext	116
14. Custom Controls	119
Drawing	121
Handling Events	123
Being a Good Citizen	124
Bindings	126
Challenge: Value Transformers	127
15. Animation Support	128
16. Keyboard Events	129
The Cell	129
The View	131
17. Accessibility	133
Accessibility Inspector	133
NSAccessibility Informal Protocol	134
Faux UI Element	135
Adding Accessibility Support to XYSliderCell	138
18. Interface Builder Plug-ins	142
NSCoding	142
New Project	143
xib Files	145
First Test	146
Non-view Objects	147
Inspector	150
19. Understanding NSScrollView	152
NSScrollView	152
Exercise	153
Constraining Scrolling to a Grid	160
